MAFDEL

THE EUROPEAN MANUFACTURER OF THERMOWELDABLE CONVEYOR BELTS

Mafdel is a family-owned company, which, since 1981, has been designing and manufacturing a wide range of thermoweldable conveyor belts, profiles and associated tools.

Mafdel's product range is manufactured in France at the group's 3 factories:

Saint-Georges d'Espéranche (38)

Heyrieux (38)

Vigneux de Bretagne (44)

Whether it's extruding, calendaring or fitting accessories, our production is managed by our experienced technicians, ensuring an optimised level of quality.

When you work with Mafdel, you can be assured that the solution will satisfy the most arduous challenges whether they be hygienic, mechanical or environmental.

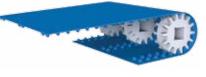

AN EXTENSIVE RANGE

Thermoweldable profiles

Monolithic conveyor belts

Positive drive belts

Welding and tooling

Accessories, such as guides, slides, scrapers and sprockets are all available.

MAFDEL

A TEAM OF EXPERTS AT YOUR SERVICE

Our design and technical sales teams are at your service to help you to create belts to meet your product handling requirements.

Our large stocks and the flexibility of our production facilities ensures the shortest delivery times possible.

A WORLDWIDE PRESENCE

Mafdel products are available worldwide through a network of distributors and partners in over 60 countries.

Find your sales and technical contacts in France, abroad and at trade shows:

Mafdel is an active member of:

APLLICATIONS

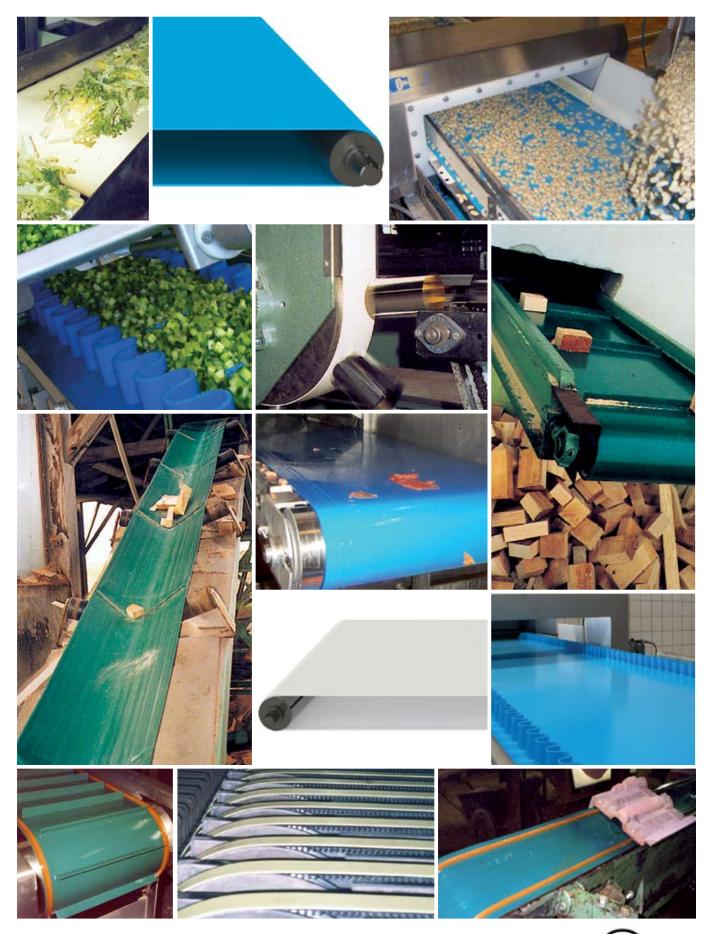

APLLICATIONS

BENEFITS

Our thermoweldable flat and conveyor belts are designed for industrial materials handling. They have many advantages:

REDUCTION OF MAINTENANCE COSTS

- Thermoweldable belts allow simple and fast on-site joining without the need to dismantle machinery.
- Belt failures can be repaired immediately which reduces production downtime.
- Reduced and simplified stocks.

IMPROVED OPERATIONAL EFFICIENCY

- A wide choice of materials, hardnesses, profiles and coatings are available allowing applications to be fine tuned for maximum performance.
- Mafdel profiles offer high resistance to abrasion, cuts, oils, greases and solvents, which greatly increases service life compared to traditional plied textile belts.
- Aramid, polyester, steel or stainless steel reinforced versions are available for maximum load capacities.

FOOD SAFETY

- Mafdel profiles offer monolithic, waterproof and rot-proof design.
- They also have a high resistance to many chemicals, animal and vegetable oils and fats.
- Easy cleaning, results in a significant reduction in water and detergent consumption.
- All profiles comply with European and international food standards.

BENEFITS

Table comparing the advantages of the different types of industrial conveyor:

| | MAFDEL BELTS | TEXTILE BELTS | MODULAR BELTS |
|----------------------------------------|-----------------|------------------|------------------|
| Ease of installation | + | _ | + |
| Is self tracking | + | _ | + |
| Resistance to chemicals & hydrocarbons | + | _ | + |
| Abrasion resistance | + | _ | _ |
| No contaminating fabrics | + | _ | + |
| Ease of maintenance | + | _ | _ |
| Water, chemical, labour saving | + | _ | _ |
| Easy cleaning | + | _ | _ |
| Simplicity of inventory management | + | _ | + |
| Quiet operation | + | + | _ |
| Available in antimicrobial | + | _ | + |
| Available in metal detectable | + | + | + |

The applications of our thermoweldable belts are numerous and in many applications such as:

| FOOD INDUSTRY SECTORS | PACKAGING | GENERAL MANUFACTURING | OTHER SECTORS |
|--------------------------|-----------------|--------------------------|---------------|
| Meat | Matal packaging | Tile | Automotive |
| Abattoir | Metal packaging | Brick | Engineering |
| Cheese and dairy | Plastics | Ceramics | Logistics |
| Canning | Paper | Concrete products | Pharma |
| Fruit & vegetable | Cardboard | Dry-wall manufacture | Cosmetics |
| Fish | | Wood | Agricultural |
| Bakery | | Glass | |
| Cookie (Biscuit) | | | |

DEL/ROC, DEL/FLEX and SOUPLEX guides upon request

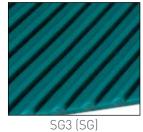

Possibility of studs, sawtooth, SG3 or lattice embossing on the upper surfaces (except DEL/ROC materials). Maximum width: 380 mm. Colours - green, white, blue.

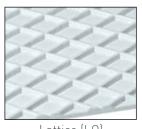

Sawtooth (US)

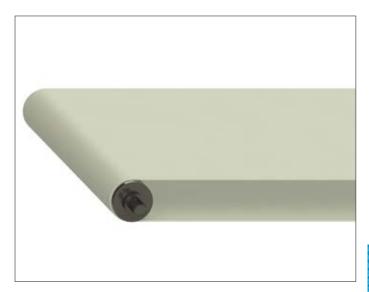

Lattice (LO)

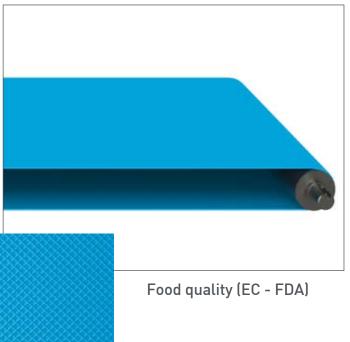

DEL/ROC

Food quality (EC - FDA)

Characteristics

- Underside smooth or structured.
- Easy to clean.
- Abrasion resistant.
- Resistant to chemical attacks.
- Excellent tensile strength.
- Good friction coefficient on support beds.

EMBOSSED underside (EM)

- Reduces friction on stainless in wet or fatty environments.
- Increased drive traction.

Application

- Medium to heavy load capacity.
- Accumulation possible.
- Full load start-up possible.
- Suitable for long centre distances.

Methods of joining

- Butt welded.
- Overlap in heat press
- Electrode welded.
- Stainless or plastic fasteners (including integral welded fasteners).

Application of trapezoidal guides, flights and perforations on request.

ARAMIDE REINFORCED FLAT BELT

Food quality (EC - FDA)

Features

- No elongation due to Aramide cables.
- High impact resistance.
- High resistance to abrasion and cuts.

Application

- Small pulley diameters.
- Medium to heavy load capacity.
- Abrasive products.

Method of joining: Joined in our workshops and supplied endless.

PROBELT ARAMIDE REINFORCED

Food quality (EC - FDA)

Features

- No elongation due to Aramide cords.
- High impact resistance.
- High resistance to abrasion and cuts.
- Excellent guidance due to the moulded guide on the reverse

Application

- Small pulley diameters.
- Medium to heavy load capacity.
- Abrasive products.
- Resistant to Lateral forces.

Method of joining: Joined in our workshops and supplied endless.

ELASTOBELT

Food quality (EC - FDA))
Standard embossing possible on the upper surface

Feature

- High grip.
- Very flexible.
- High resistance to impact and abrasion.
- Very good elasticity, ideal for conveyors without tensioning system.
- Small pulley diameters.

Application

- Pulley linings.
- Sleeve.
- Bibs, scrapers, protection...
- Coating on flat and trapezoidal straps.
- Conveying very low loads over short distances.

Joining method: Butt welded or mechanical fasteners.

TOTALGRIP

Food quality (EC - FDA)
Standard embossing possible on the upper surface

Feature

- High grip.
- Very flexible.
- High impact resistance.
- High abrasion resistance.
- Very good elasticity, ideal for conveyors without tensioning system.

Application

- Pulley linings.

EQUIPMENT

HIGH FREQUENCY WELDED CLEATED BELTS

- Available on polyurethane (PU) belts only
- No additional materials or adhesives
- Excellent resistance to tearing
- Radiussed base of the cleat: facilitates cleaning and prevents microbial development
- Available full width or partial width, centred or offset

EQUIPMENT

HOT AIR WELDED CLEATS

- On polyester elastomer DEL/ROC (TPE) belt types
- On PU belts for cranked cleats (angles different from 70°)
- Cleats welded using either one or two electrodes according to cleat thickness
- Excellent resistance to tearing
- Over the entire width of the belt, centered or offset

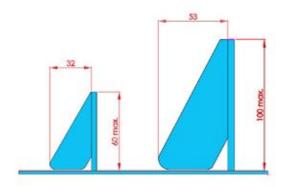

| MATERIAL | THICKNESS (mm) | MINIMUM HEIGHT (mm) | MAXIMUM WIDTH (mm) | MINIMUM PITCH (mm) | |
|----------|----------------|---------------------|--------------------|--------------------|--|

| | 4 | | 1800 | | |
| | 5 | | | | |

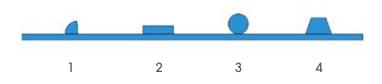

GUSSET (CLEAT SUPPORTS)

Gussets are reinforcements welded behind vertical cleats to provide superior stiffness in the event of higher loads.

- 2 standard types and 2 thicknesses (5 and 8 mm) are offered depending on the height of the cleats, the load supported and its distribution on the cleat.
- 2 to 5 gussets distributed over the width of the cleat.

OTHER CLEATS

- 1. Welded cleats
- 2. Flat profile
- 3. Round profile
- 4. Trapezoidal profile

EQUIPMENT

LONGITUDINAL GUIDES

TRAPEZOIDAL PROFILES

Trapezoidal profiles of 6x4mm, 8x5mm, 10x6mm, 13x8mm or 17x11mm can be welded on the upper surface of the belt.

Central guide

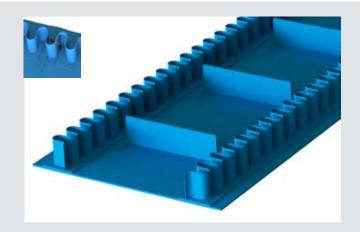

• Arranged over the belt width to channel products.

Side guides

- On the top side to retain small products.
- Fitted to the edges of a cleated belt to retain the belt in the transition from one angle to another

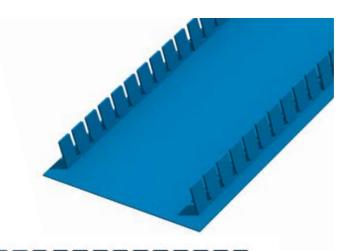

SIDE WALLS

- For efficient containment of conveyed product (bulk).
- Heights from 20 to 60 mm.
- Belts with mechanical fasteners can also have the walls fastened mechanically.

STRAIGHT SIDE WALLS

- For lateral holding of objects on the belt
- Edge height: 20 to 140 mmStandard cutting, possibility of adaptation according to the application

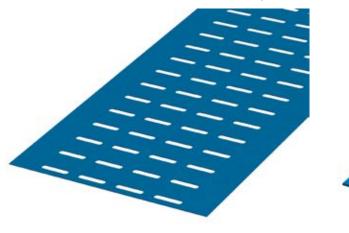

PERFORATIONS

Perforated belts are available:

- for draining,
- for applications where a vacuum is required to hold a product in position.

Diameter, shape and positioning of holes can be discussed with our technical staff. Punching available over the entire belt width up to 1800 mm wide.

CNC CUTTING

- Custom productions of single-material items in TPU or TPE. Rings, gaskets strips, etc. cut to specification.
- Large selection of thermoplastic materials with very good abrasion and tear resistance.
- Hardness: 70 ShA, 85 ShA, 90 ShA, 93 ShA, 95 ShA, 55 ShD
- Thicknesses available dependent upon hardness: 1,5 2 3 4 5 mm
- Maximum width: 1800 mm
- Colors: translucent, green, white, blue, black
- Materials suitable for food contact according to EU regulation N10/2011 unless otherwise specified
- Special manufacturing: white DEL/FLEX belts 800x8 mm, 800x10 mm, 800x12 mm

SPECIAL BELTS

BLACK PRIMAFLEX

| Colour | Black |
|---------------|-------------------|
| Material | Polyurethane |
| Hardness | 90 ShA |
| Upper surface | Smooth |
| Lower surface | Smooth or brushed |

Standard embossing possible on the upper side.

Feature

- Shock resistant.
- Abrasion resistant.
- Resistant to cuts.
- Tear resistant.

Application

- Saw blade protection.
- Bibs, scrapers, protection...

| Flat belt width < 100mm | Conveyor Belt width ≥ 100mm | Belt Thickness (mm) | Maximum Width (mm) | Weight (kg/m²) | |

| Thickness | 2 - 3 - 4 - 5mm | | 2 - 3 - 4mm | 1.6 - 3mm | 1.5 - 3 - 4mm | |

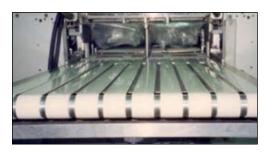

Embossing possible on one side.

FLAT BELTS

FLAT BELT

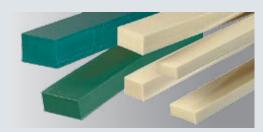

- Flat belt: any width < 100 mm.
- * Quality: **DEL/ROC, DEL/FLEX, SOUPLEX, TOTALGRIP** and **ELASTOBELT**.

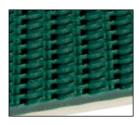

BARS

- Material: DEL/ROC, DEL/FLEX, SOUPLEX, TOTALGRIP, ELASTOBELT.
- Maximum width: 140 mm
- Max thickness: 35 mm.
- Special manufacturing: white DEL/FLEX belt
- Max width: 800 mm
- Thicknesses: 8, 10 and 12mm

FLAT BELT COVERINGS

- Applied on DEL/ROC, DEL/FLEX and SOUPLEX belts (except PVC griptop on DEL/FLEX Belt).
- Maximum width: 140 mm.

Griptop PVC 35 ShA (NA)

Griptop rubber 50 ShA (NC)

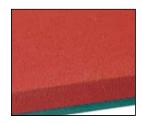

Lycra 25 ShA (LY)

Polyester felt (FP)

Aramid felt (FA)

Linatex 40 ShA (LI)

Other coatings, please contact us.

BUTT WELDING

FLAT BELT AND CONVEYOR BELTS UP TO 210MM IN WIDTH

J50 clamp MC50 iron

for flat belting < 60 mm and round belting of all diameters

Power: 150 W

MC100 iron Power: 220 W

For flat belting ≤120mm and flat belting with trapezoidal guides 10x6mm and 13x8mm

MC200 iron Power: 300 W

J200L clamp

For belts ≤ 210 mm and belts with trapezoidal guides 13x8mm or 17x11 mm

MC50 / J50 tool case includes:

- MC50 iron
- J50 clamp
- S135 shear
- B10 trimming pliers

OTHER METHODS OF JOINING

HEAT PRESS WELDING

Method similar to standard belt types.

• DEL/FLEX and SOUPLEX belts: Belt ends cut square and overlapped 5mm in a press.

This process is not suitable for DEL/ROC belts.

STAINLESS FASTENERS

- Joints comprise 2 half-staples with a coated stainless pin.
- For belt thickness 1.5 mm to 5 mm.
- All widths.
- Fasteners are hammered on by using a special tool and a specially designed jig.
- Suitable for all DEL/ROC, DEL/FLEX and SOUPLEX bands.

PLASTIC WELDED FASTENERS

- Available on certain thicknesses of polyurethane or polyester monolithics. Please enquire.
- Food quality (EC FDA).
- Allows use on metal detectors.
- Up to 1100 mm in width, beyond consulting us

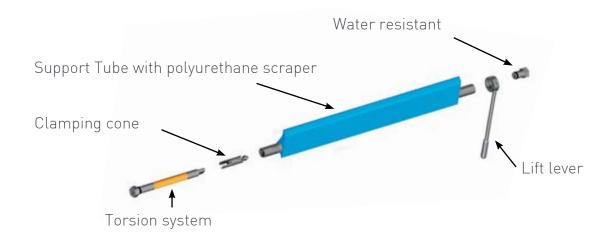

SCRAPERS

The DEL/CLEAN scraper ensures effective cleaning, permanent cleanliness of the conveyor belts and prevents:

- the fouling of the conveyor
- contamination of the substances transported
- material losses

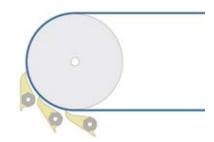

The DEL/CLEAN scraper has many advantages:

- Small footprint
- No lateral offset
- Quick and easy installation
- Adaptable to any existing or new installation
- Suitable for all types of conveyor belts
- Easy to clean
- Simplified Maintenance
- High resistance to hydrolysis: Ether Base High abrasion resistance: Ester Base

The position of the scraper may vary depending on the need for product recovery.
