ACCESSORIES

STRAIGHT PROFILES

- Profiles allow the conveying products on an inclined application.
- Heights: 25 to 150mm.
- Widths recut on request.
- Profiles can be grooved to reduce the sticking of products*.
- Reinforced profiles with gussets depending on belt type.

SCOOPED PROFILES

- Scooped profiles increase the volume of conveyed products on steep inclines.
- Height: 50mm*
- Widths recut on request
- Profiles can be grooved to reduce the sticking of products*.

SIDEGUARDS

- Heights: 25 to 100mm*.
- Positioning of the sideguards in conjunction with belt edges: refer to technical sheet.
- Minimum flexing on reverse bending: refer to technical sheet.

*Availability according to the belt type.
RUBBER-TOP MODULES

- Rubber-top modules allow the conveyance of products on inclines or declines.
- Material: Embossed black rubber 45ShA and not available in food grade.
- Distribution on the belt by request.

WHEELS

- Material: Acetal.
- Technical characteristics: refer to technical sheet
- Wheels are used to reduce the accumulation effort, or create space between conveyed items.
